# **TUCSON HYDROCONTROLS**

## **OSI20MS95**

#### **FLUID POWER SYMBOL**

### Overcentre Valve OMS Mounting

#### **APPLICATION**

Overcenter valves give static and dynamic control of loads by regulating the flow into and out of hydraulic actuators. The Motor Mounted bodies reduce the need for excessive piping and instead give a clean interface for the Overcentre Valve to be used in conjunction with your motor. The prime sized ports allow for directly connecting the valve bank to the Overcentre valve.

#### **OPERATION**

The check section allows free flow into the actuator The OM Motor interface provides stacking of the valve optimisation of load control and energy usage, a choice screw and locknut. of pilot ratios are available.

#### **FEATURES**

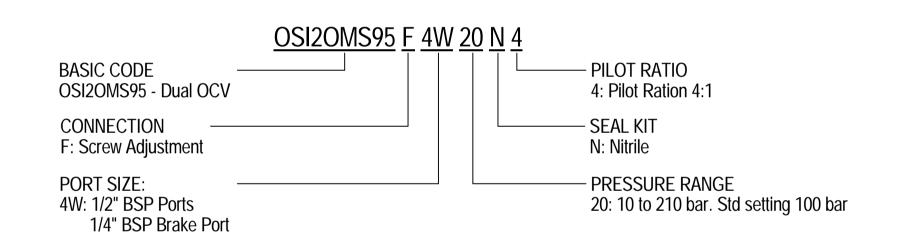

then holds and locks the load against movement. The directly onto the Hydraulic Motor. Mating surfaces are pilot assisted relief valve section will give controlled ground and ports with O-rings are spot faced. The valve movement when pliot pressure is applied. For pressure setting is adjustable by means of an adjusting

#### **General Specifications**

Description	direct acting overcentre valve
Construction	Screw-in Cartridge Construction for Cavity
Mounting	2 bolt holes for direct OMS motor flange
Installation Position	any
Ambient Temp.	-20°C to +50°C
Manifold Material	Aluminium
Weight	OSI2SHOMS95 : 2.50 kg

#### **Hydraulic Specifications**

Hydraulic Fluid	Mineral oils. Contact sales office for other fluids.
Max. Pressure	250 bar
Rated Flow	100 lpm
Max. Contamination Level	BS5540/4 Class 18/16/13 (25µ nominal)
Viscosity Range	5 to 500 cSt
Leakage Flow	Less than 0.3 ml/min (5 dpm)
Hydraulic Fluid Temp.	-20°C to +90°C (Standard Seals)
Mounting	Line
Peak Pressure	350 bar
Max. Flow	120 lpm

#### **ORDERING CODE**

**DIMENSIONS** 

#### BASIC CODE: OSI2OMS95 F 4W 20 N 4
